Reusable mask

✓ Ecological

✓ Meets "community" recommendations

✓ Traceability with RFID chip

Dimensions: 23 x 9.5 cm (LXH)
double-layer mask (100 g/m²)

Reusable mask

Double-layer face mask that meets the particulate and microbiological filtering efficiency (BFE) standards.

Particular attention has been paid to the choice of materials: an outer layer of polyester microfilament (with carbon yarn) and an inner layer of polyester knitted fabric. The masks include ties at the back of the head and adjusts itself at the nose. They meet the recommendations for "community" masks (NBN DTD S 65-001:2020 and AFNOR SPEC S76-001:2020) and are both comfortable and will withstand numerous decontamination and/or sterilization cycles.

The decontamination processes have been developed to guarantee a fungicidal, bactericidal and virucidal effect whatever the microbial load. This is confirmed by standardised measurements, the publication of standardised control indicators (DES Controller) and a Log 6 reduction.
